AI-BASED PLUG & PLAY

SAFE HOTSPOT

CLOUD WI-FI

You can offer your customers a unique service with secure Internet sharing

You can include the devices you use in your business into our Cloud network without making any changes.

CLOUD LOG

All logging of your hotspot device is performed by our Cloud Services. In this way, you will not experience any data loss in case of any problems with the device. You can continue to use your new device instead of your broken device. All users, customers, etc. your other information automatically by Cloud Services updated.

If you wish, you can download our brochure from our website by scanning the QR Code.

SAFE HOTSPOT EASY AND SECURE

As Safe Hotspot, we serve you with a structure that is easy to use, safe, expandable and constantly adding innovations.

Manage all your Hotspot devices and logs from a single center. With the Safe Hotspot Admin Panel, you can manage all your hotspots up to 5 000 devices from a single brand independent center on the basis of Country, Province, District.

USER-FRIENDLY INTERFACE

HIGH PERFORMANCE

%100 SAFE

MODERN DESING

Safe Hotspot has been developed entirely by Turkish software engineers based on Artificial Intelligence, considering Digital Transformation needs.

The development of technology and the widespread use of the internet lead businesses to use digital solutions today. Realizing the importance of providing better service to their customers in the digital world, businesses primarily capture the digitalized transformation with secure and high-quality Internet connection, instant surveys to customers, and timed SMS campaigns.

Using SAFE HOTSPOT, which is designed to work only with the Cloud service without incurring device costs, consists of only a few steps.

With Safe Hotspot Cloud services, there is no log loss problem like traditional systems. No information is kept on your device. Your device only connects with our Cloud service. Therefore, you will never experience crashes or data loss due to data size.

01

CHOOSE THE SUITABLE PACKAGE FOR YOUR BUSINESS

You make the purchase by choosing one of our packages according to the number of instant online users in your business→

02

COMPATIBILITY CONTROL OF THE DEVICE IN YOUR BUSINESS

Our engineer and technician teams check the compatibility of any of your modem/Access Point/Firewall devices you are using in your business.

03

CLOUD SERVER IDENTIFICATION PROCESS

Your appropriate device will be identified to our Cloud Server service by our team with your Static IP and Safe-Hotspot is registration is created.

04

SAFE HOTSPOT IS ACTIVE NOW WE CAN GET STARTED

Your system is active, now you can provide quality customer experience. As you may wish, you can immediately start sharing surveys and SMS with your customers in compliance with the KVKK.

Safe Hotspot, easy to install and KVKK compliant
It is a system that can be integrated with purchases.

It continues its activities in accordance with the Data Protection Law (KVKK) and the Law and Regulation on the Regulation of Electronic Commerce No. ETK 6563. The contact information collected during the registration to the system is considered as authorized.

With the advanced reporting module, you can analyze your customers' internet usage, internet sales, and many more additional features in your business.

Get to know your customers with surveys, advertisements and banners, and you can ensure both the quality of your business and customer loyalty.

You can design your special welcome screen for your customers who will connect to the internet in your business and create a completely personalized space.

WHY CLOUD SAFE HOTSPOT?

“

Safe Hotspot used the requirements of the digital age while providing wifi service completely customer-oriented and went far beyond just providing internet service.

We are making the internet, which is the biggest data source today, able to analyze with artificial intelligence for businesses.

ACCORDING TO DIGITAL
TRANSFORMATION NEEDS
SPECIALLY DESIGNED FOR YOU

YOU CAN DEVELOP YOUR BUSINESS WHILE
YOUR CUSTOMERS GET SAFE AND QUALITY
INTERNET SERVICE

YOU CAN DEVELOP YOUR BUSINESS WHILE YOUR CUSTOMERS GET SAFE AND QUALITY INTERNET SERVICE

A structure has been designed in which new features will be added every day. every innovation will be automatically uploaded to the system and all our customers will be able to benefit from these innovations up-to-date and free of charge. Since your data is kept completely on our cloud servers in the country, your logs will be under Safe Hotspot guarantee for 2 years, even if your devices that you use locally fail. We put an end to the problem that my data will be lost when your device malfunctions.

We do not create a structure in our packages where the features are gradually increased along with the price. All of the features are unlimited in all our packages, you just need to choose your package according to the number of online users you need. You have a small number of users, but we put an end to the problem of buying the only feature you need to use from the highest packages, even though you don't need it.

“

Not only can you increase the loyalty of your customers with your Wi-Fi network, you can also see the shortcomings of your business and you can get one step closer to your goals with the suggestions you receive from your customers.

SO MUCH FEATURES

With Safe Hotspot, you will be able to get information about your customers, their suggestions and you can track your complaints. If you wish, we have created a unique system where you can create Internet packages and generate sales revenue.

You can also include the devices you use in your business into our Cloud network without making any changes.

You can manage up to 5,000 devices from a single panel. Manage all your devices and logs from a single center. With the Safe Hotspot Admin Panel, you can manage all your Hotspots up to 5,000 devices from a single, brand-independent center on the basis of Country, Province, District.

ZERO FOR INSTALLATION HARDWARE COST

If you have a few simple-featured modems/Access Points/Firewall devices that will enable the hotspot system to work, you can join our Colud system immediately without any equipment costs.

LOGS IN ACCORDANCE WITH 5651 LAW ARE SAFE

Your logs are stored in the Cloud system for 2 years. All logging operations are performed by our Cloud Services. In this way, even if your device malfunctions, the logs will always be safe.

SURVEY AND SMS MANAGEMENT PANEL

Thanks to the panel created specifically for your business, you can create surveys or advertisements and report them.

SPEED AND PACKAGE MANAGEMENT PANEL

You can set the Internet speed of your customers who are included in your Wi-Fi network, either collectively or on a category-based basis, and enable them to purchase online speed by creating packages.

ADVANCED REPORTING MODULE

You can filter your customers using the Internet according to their online, offline, male, female, age and even Internet usage, and you can send targeted campaigns if you wish.

SUGGESTION AND COMPLAINT MANAGEMENT PANEL

You can receive positive, negative or suggestions about your business from your customers using the internet service as feedback and follow them on the Suggestion & Complaint panel.

With 6 different system login options, for each device together or separately, SMS, Identity No, Passport No, Room No, Free, SMS You can perform user authentication.

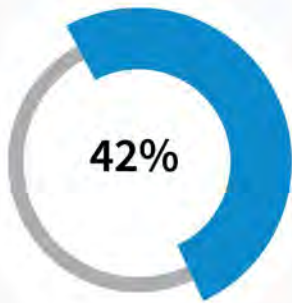

DIJITAL TRANSFORMATION

In today's world, companies; With the changing consumer and customer behaviors, increasing digitalization, they question their business models, the experience they give to their customers and the way they do business.

Especially in this period, where the use of the Internet and social media has increased so much, digital change manifests itself regardless of size and maturity, regardless of sectoral discrimination. And this is just the beginning...

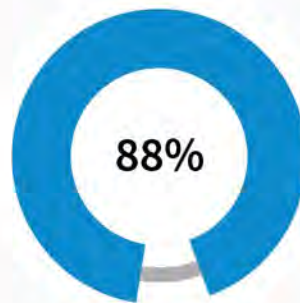

Digital Transformation, importance of internet and statistics

Digital transformation; We define it as the transition process to new ways of doing business and thinking that will create value for customers and the ecosystem, improve business processes and increase the capabilities of all companies by using digital, social, mobile and new technologies.

10 Hours of Internet Usage a Day

Internet users in Turkey spend about 10 hours a day, or 42% of the time, on the Internet.

75 million mobile users

88% of Turkey's population consists of mobile users.

54 million social media users

65% of Turkey's users are social media users.

Safe Hotspot has been designed in such a way that businesses can better understand their operations and the market by making sense of the way businesses do business and the data they collect from their customers, and in this way they can gain an advantage over their competitors.

In this way, we use an advanced reporting module to increase productivity and respond quickly to customer needs.

Our packages are not selected according to features, but according to the number of users. All our features are unlimited in every package.

You can find the cloud package suitable for your business among the options below. If you are undecided about the cloud package suitable for your business, if you contact us, our technical teams will help you decide by determining the most suitable cloud package for you. Please contact us for your cloud requests for more than 200 online users other than the packages below.
